

BEYOND SCHOOL PROJECT
LESSON ACTIVITY PLAN

ACTIVITY	How Much Does It Weigh?
The aim of the activity	Estimating the mass of an object. Finding the real mass by measuring.
Places where the event can be held	<ul style="list-style-type: none">● The Tofaş Museum of Cars and Anatolian Carriages● Neighbourhood Market
Age group for the activity	7-11

A. BEFORE OUT-OF-SCHOOL LEARNING ACTIVITY

A. BEFORE OUT-OF-SCHOOL LEARNING ACTIVITY	
Educational tools	Balance scale- different objects in the classroom
Method, technique and strategies	Presentation, asking-answering
PRACTICE	
Introduction of the activity	The teacher asks the students questions about the meaning and importance of scales in our lives.
Development of the activity	Students weigh some objects in the classroom on the scales one by one. By weighing they learn what gram and kilogram means.
Evaluation of the activity	Students understood the importance of weight measurement units in our daily lives.

B. IN THE OUT-OF-SCHOOL LEARNING ENVIRONMENT

Educational tools	Scale,chenille
Method, technique and strategies	Handicraft activities
PRACTICE	
Introduction of the activity	The teacher and students visit the museum with a guide. They learn about the establishment of the museum. They learn about the development and usage areas of the scales from past to present.
Development of the activity	Students visit the scales exhibition.They weigh chickpeas and beans. After touring the museum they sit on tables and create their scales using chenilles.
Evaluation of the activity	Using their handmade scales all students play balance games.So they get the importance of balance.

C. AFTER OUT OF SCHOOL LEARNING ACTIVITY

Educational tools	Scale, fruits and vegetables
Method, technique and strategies	The tell-show-do-apply model
PRACTICE	
Introduction of the activity	Students visit the neighbourhood market and have a chance to see scales.
Development of the activity	They buy some fruits and vegetables and observe how they are weighed.
Evaluation of the activity	He/she learns the information about the usage areas of the unit of weight measurement in daily life by doing and experiencing.After turning back to school they eat the fruits and vegetables they buy.
